AYUSH JAWANE

Software Developer

✉ayush.jawane27@gmail.com ☎ +91-9826647678 ■ Rau,Indore-452001 inlinkedin.com/in/ayush-jawane

PROFESSIONAL SUMMARY

Result-driven Software Developer with a strong foundation in Java, Full Stack development, Artificial Intelligence, and Machine Learning. Skilled in OOP's SQL, HTML, CSS, JavaScript, Spring, REST APIs, and backend development concepts. Familiar with SQL, and database integration. Proficient in Python and core ML work flows , with a passion for building scalable software solutions and progressing toward AI/ML-focused development.

TECHNICAL SKILLS

Programming Languages: Java , Python , C++
Database: SQL , MySQL
Frameworks: Spring , Microservices
BuildTools &Development: Git , GitHub , Eclipse , VSCode
WebTechnologies: HTML5 , CSS3 , JavaScript
Core Competencies: RESTAPIs , OOP , Data Structures , Problem Solving

PROFESSIONAL EXPERIENCE

Software Developer Intern **23 June 2025 – 20 July 2025**
InternPe

- Designed and developed an AI-powered chat application capable of generating context-aware responses using Python and NLP techniques.
- Implemented and optimized chatbot features using Python , Scikit-learn , and TensorFlow to improve response equality.
- Collaborated with in an agile team to integrate AI/ML components into software applications.

AI/ML Intern **20 June 2026 –05 July 2026**
MaincraftsTechnology

- Successfully completed an internship in Artificial Intelligence & Machine Learning , demonstrating dedication , professionalism , and contributing to projects (InternshipID:MT6608).

PROJECTS

AI Chat Processor

- Developed a Python-based AI chatbot using ML libraries for intent classification and context-aware response generation deployed as a RESTAPI.

Predictive Model Evaluation System

- Built a web-based dashboard using HTML , CSS , JavaScript, and a Python backend to visualize model metrics,confusion matrices, and training accuracy curves.

Divya-Yatri — Smart Pilgrimage Assistance Platform

- Developed a web-based platform to simplify pilgrimage planning and provide relevant destination information. Designed user-focused workflows for destination discovery, trip planning, and pilgrimage assistance. Integrated database functionality and APIs to manage and display application data. Built a structured interface focused on usability and accessible travel information.

Trial Equity Back testing Platform

- Developed a financial analytic platform to evaluate trading strategies using historical market data. Integrated OHLCV and financial data for 115 NSE stocks for historical strategy analysis. Implemented strategy execution, P&L calculation, portfolio performance, and back testing workflows. Designed backend API's and database workflows to process and analyze historical market data.

EDUCATION

Bachelor of Technology–AI & Machine Learning Engineering **2023–Present**
IPS Academy Indore

HSC– Science **2022–2023**
HSM Global Public School Bilaspur

CERTIFICATIONS

- Effective Presentation – HP LIFE Online Course
- RDBMS PostgreSQL Training – Database Management Certification
- Division Level Quiz – Academic Excellence Recognition

SOFT SKILLS & LANGUAGES

Soft Skills : Leadership ,Team Management , Communication , Analytical Thinking , Problem-Solving , Critical Thinking
Languages : English (Professional) , Hindi (Native)
